### Course Description

A non-conventional highly interactive course designed to provide UOS students with a unique experience into identifying the concepts of innovation, sustainability, entrepreneurship, growth and leadership. At a practical level, this course equips students with the necessary design thinking and entrepreneurial skills and tools to enhance their personal development, business-oriented mindset and future professional career.

## Course Learning Outcomes

This course aims to prepare students to take up the challenges at the time when they graduate by building self-reliant skills as innovation pioneers of University of Sharjah and leaders in UAE national innovation and entrepreneurial field. The course has the following specific objectives:

1. To equip students with the necessary capabilities to be able to utilize innovation, entrepreneurship, sustainability and leadership into their personal and career development
2. To use creative thinking tools to encourage entrepreneurial activity and innovative input into the UAE

By the end of successful completion of this course, the student will be able to:

1. Identify and differentiate the concepts of creativity, innovation, entrepreneurship, growth, and leadership. (CLO1)
2. Utilize design thinking concepts and tools to develop a future career. (CLO2)
3. Use various tools and techniques in problem-solving, creative thinking and idea generation. (CLO3)
4. Develop vision, mission and strategy statements and business model canvas. (CLO4)
5. Analyze business case studies and reflect on various entrepreneurial experiences in group and individual work. (CLO5)
6. Discuss the relevance of sustainable innovation/entrepreneurship, circular economy and UAE's Green Economy Agenda (CLO6)

## Alignment of Course Learning Outcomes to Program Learning Outcomes

| Program Learning Outcomes                                                                                                      | Course Learning Outcomes                                                                                                                                                                                                                                                                                     |

**Other Resources****Blackboard resources:**

Students enrolled in this course will be given an access to a variety of internet resources, including course material that will be posted on blackboard. Students are strongly advised to access course material posted on blackboard for their learning. Course outline, power point slides, assignments, marks, and other materials will be made available through blackboard.

Harvard Business Review

MIT Sloan Management Review

California Management Review

Journal of Management

International Journal of Organizational Analysis

Management Decision

**Attendance Policy**

Attendance is compulsory. A student missing 10% (6 hours) of the total allocated course hours will receive 1<sup>st</sup> warning notice and a student missing 15% (9 hours) will receive 2<sup>nd</sup> warning notice. A student missing 20% (12 hours or more) will be forced to withdraw (in accordance with the University regulations).

---

<sup>2</sup> This book is only available now in Khorfakkan Community College library. In the process of ordering copies for women and men's libraries. Selected chapters will be provided to students as photocopies.

## **Plagiarism/Cheating**

Students are expected to do their own work. You are allowed to work on assignments in teams only if specified by the instructor. In other words, students are encouraged to communicate about general principles of the course, but all assigned homework must be done on an individual basis. The instructor is available to provide any assistance that you may need. Cheating is considered a serious offense by the university. You should be aware of the severe penalty for cheating (refer to the student code of conduct published in the university catalogue).

## **Code of Conduct**

It is essential that a student abides by the rules of the University and respect everyone else's property and rights. However, should a student break the rules of the University and shows disrespect to instructors and fellow students, he/she should be prepared to bear the consequences of his/her actions. Below is a list of some of the University violations that call for discipline. It is the student's responsibility to read and understand the by-laws regarding the student code of conduct that was duly approved by the University Board of Trustees in its ninth meeting held on 28/3/2002.

The UOS policies and procedures part of Student Code of Conduct state: "If a student is caught cheating or about to cheat in an examination or a test, the following penalties are applied to him/her collectively:

- He/she is failed in the course in which he/she was caught cheating on examination.
- All the other courses in which the student was registered for during the semester in which he/she was caught cheating, are cancelled.
- The student is dismissed from the University for one full semester following the semester session in which he/she was caught cheating and the summer is not considered a regular semester for this purpose. No course completed in any university elsewhere will be counted for him/her during the period of dismissal from the University.

### **Academic violations:**

- Breaking the laws of the State and the explicit rules of the University.
- Misbehaving in classrooms, laboratories, libraries and all other places in the University.
- Plagiarism: Plagiarism is the act of stealing someone else's property and claiming it as one's own. This property might be a paper, a book, an idea, a computer program, an experiment, an exam paper, an answer, etc. Being free, a person is entitled to act in accordance with one's beliefs, but it is wrong to plagiarize. Therefore, a person caught plagiarizing or stealing will be subjected to the University's code of conduct and will be punished accordingly. Students are alerted to this misdemeanor and are encouraged to behave properly and avoid exposing themselves to the consequences of this unethical and illegal behavior.
- Inappropriate collaboration: The norm is that close collaboration with others on academic work requires acknowledgement of other collaborators. Inappropriate collaboration involves working with others in developing, organizing, or revising a project, which might be a paper, a presentation of a research or design project, or a take-home examination without acknowledging their help.
- Dishonesty in examinations and submitted work: All academic work and materials submitted for assessment must be the work of the student. Cheating is not limited to copying from others' work and giving unauthorized assistance, but it also includes the use of devices or procedures for the purpose of achieving false scores on examinations. Students are prohibited from submitting any material prepared by, or purchased from, another person or company.

- Work completed for one course and submitted for another: Students may not present the same work for more than one course. Students are reminded that when incorporating their own past research in current projects, they need to document such previous work.
- Deliberate falsification of data: Students must not deliberately falsify data or distort supporting documentation for course work or other academic activity.
- Interference with other students' work: Students may not intentionally interfere with the work of others by sabotaging laboratory experiments, research or digital files, giving misleading information or disrupting class work.
- Copyright violation: Copyright laws govern practices such as making use of printed materials, duplicating computer software, duplicating images, photo duplicating copy-righted material, and reproducing audio-visual work. Such practices must be observed. The code of conduct forbids theft and the unauthorized use of documents.
- Complicity in academic dishonesty: Complicity in academic dishonesty consists of helping or attempting to help another person commit acts of academic dishonesty or willfully assisting another student in the violation of the academic code of conduct. It also involves pre-meditated and intentional acts, such as doing the work, designing or producing a project, willfully providing answers during an exam, test or quiz for other students; calling a student on a mobile telephone while taking an exam; providing a student with an advanced copy of a test; leaving inappropriate materials behind at the site of an exam or test; altering the outcome results of an exam, and so on.

## Grading Rubrics for Assessed Elements

### Group Project 1: Design Thinking Report for a Sustainable Startup (25%)

You are expected to use the design thinking skills that you have learned in this Course in order to identify a specific problem/need, such as a major unmet consumer need or think about how to satisfy existing market demand in a new way—one that has the potential to create an innovative **sustainable** business with positive **environmental or social impact, and also potential for economic impact**. Your deliverable is a Design Thinking Report. Please include summaries of your interviews in the report.

You will write a Design Thinking Report that covers the Empathy, Define, Ideate, Prototype and Test stages of the design thinking process

## Group Project 2: Business Plan for Sustainable Startup (25%)

Students taking the Fundamentals of Innovation and Entrepreneurship are expected to build on the Group Project 1 (i.e. design thinking), by writing a business plan about their idea as **Group Project 2 (which should still focus on environmental or social impact, and also potential for economic impact)**. This assignment is worth 30 marks (25marks for the business plan and 5% for PowerPoint Presentation). Hence, students are expected to deliver the following:

You will write a Business Plan that contains the name of your startup, an executive summary, the business/industry overview, the market analysis & competition, the sales & marketing plan etc. Upload your work to blackboard.

### Appendix 2: Grading Rubric: Group Project 2 (Business Plan)

| Sections                    | Allocated marks (25%) |            |             |             |           |

| <b>The skills you need in delivering effective and engaging presentations to a variety of audiences</b><br>(UBC, n.d.) | You have addressed few pitch/no-pitching criteria. You have shown little to <b>no evidence of rehearsal.</b> You lack clarity of speech, with <b>no logical flow of ideas.</b> You are too soft to be heard by the audience. <b>Unenthusiastic tone. No/poor use of digital media e.g. video.</b> | You have addressed some of the pitching criteria. You have shown <b>some evidence of rehearsal/practice.</b> Your <b>speech is somewhat clear</b> although hard to follow sometimes. <b>Somewhat enthusiastic. Average use of digital media.</b> | You have addressed the pitching criteria. You have shown <b>some evidence of rehearsal/practice.</b> Your <b>speech is somewhat clear Good use of digital media.</b> But the explanation is not detailed or proficient. | A poor-quality pitch; only a few pitch criteria addressed thoroughly or to a satisfactory extent; little to no evidence of practice/rehearsal. Glaringly obvious lack of clarity of speech, with no logical flow of ideas whatsoever; too soft to be heard by all the audience for the entirety of the pitch; poor use of inflection, and a very monotonous, unenthusiastic tone. You have <b>addressed all the pitching criteria</b> thoroughly, and the presentation is well structured. |  |

## Interview with Entrepreneur/or Similar assignment given by instructor (5%)

Have you considered reflecting on the entrepreneurial journey of some real entrepreneurs?

In its basic sense, reflection refers to the **practice of evaluating past events, with the aim of learning from such past experiences**.

As students, you can learn a lot by reflecting on the past experiences of real entrepreneurs.

Reflecting on the journey of entrepreneurs, may help you gain new insights into the reality of creating startups, and may motivate you into starting your new venture in future, or help you improve your existing business (if you already own a business).

***As students studying the Fundamentals of Innovation and Entrepreneurship (FIE), you are required to **interview any entrepreneur of your choice**, in order to write a reflective report about what you've learnt from the entrepreneur's experience. In particular, ask for 20 minutes of his or her time, and simply start with the opening question: Tell me the story of how you became an entrepreneur.***

You're interview should can include the following questions: [L]  
[SEP]

- . What motivated you to start the venture? [L]  
[SEP]

- . What resources did you use to start the new venture? <sup>[L]</sup><sub>[SEP]</sub>
- . How did you acquire the resources?
- . What challenges/obstacles did you face when starting the venture? <sup>[L]</sup><sub>[SEP]</sub>
- . Any other question that allows you to cover the requirements of the grading rubric in Appendix 4

#### Appendix 4: Group Assignment: Interview with an Entrepreneur (5%)

| Sections                                                                                                                                                                         |                                                                    |                                                                                            |                                                                                                                                           |                                                                                            | Allocated marks (5%) |
